

**The versatile AirPouch Express 3 void-fill system increases packing productivity and lowers shipping costs.**

Providing easy to use air cushions on-demand for fast void-fill packing, the Express 3 system can operate in semi or fully automatic modes to create continuous strips of air cushions. AirPouch cushions feature a unique

EZ-Tear perforation that makes handling and separation of the cushions much easier.

In addition, the material feeds from a box, not a roll, reducing changeovers and operator lifting and ensuring valuable storage space is minimal.

The AirPouch system is totally portable, weighing less than 14kg and the small footprint frees up valuable space in your shipping area. The compact system operates at 15 linear metres per minute and has no need for compressed air; the operator simply loads the material and starts packing. Airpouch is ideal for a wide range of void-fill applications as well as many protective packaging applications. In addition, it is backed by Automated Packaging Systems reputation for quality and reliability.

Durable AirPouch material comes in boxes that inflate to over 8 cubic metres of void-fill (equivalent to 18 bags of polystyrene loose fill).

The material and the equipment have been designed to work together and are manufactured in Automated Packaging Systems ISO certified facilities in the UK.

**User Benefits**

- No capital outlay. AirPouch Express 3 is supplied free on-loan\*
- Fast - produces air filled cushions at a rate of 15 linear metres per minute
- Unique EZ-Tear perforations mean less operator effort to separate cushions and greater operator productivity
- Portable, all-electric table top design requires no compressed air
- Easy to install and simple to operate
- Boxed material means less reloading, reduced lifting and reduced storage space requirements with up to 45% more cushions than an average roll
- Dust free transparent cushions offer reduced product loss and less mess than EPS peanuts
- Ultra lightweight cushions reduces shipping and disposal costs

\* Subject to a minimum cushion order

optional cushion dispenser shown

EZ-Tear perforations offer ease in handling and effortless separation

Optional AirPouch dispenser positions cushions conveniently for operator use

Optional AirPouch Sensor offers automatic replenishment assuring a continuous supply of cushions

## Standard Features

- Carrying handle makes system very portable
- Simple material loading mechanism
- AirPouch cushions have EZ-Tear perforation for easy separation and handling
- Reliable equipment requires minimal maintenance
- Minimal downtime with up to 45% more material per box
- Simple adjustment with air volume and length timer
- Available with both 100mm x 200mm and 200mm x 200mm cushion sizes

## Typical Applications

Strong cushions offer superb protection for a range of void-fill applications including:

- Spare parts
- Books & CDs
- Mail order centres
- Third party logistics
- Electronic supply
- Contract packaging/fulfilment
- Automotive parts
- Pharmaceutical
- Office supply

## Options

- Stand
- Dispenser
- Bin
- Footswitch
- Sensor

## Technical Specifications

Weight:	13.7 kg
Dimensions:	52cm x 30.5cm x 36cm
Cushion Sizes:	100mm x 200mm and 200mm x 200mm
Material:	8100 or 4200 cushions per box
Electrical:	110/220 VAC; 50/60 Hz
Speed:	15 linear metres per minute
