

# PaceSetter™

## Introducing the Autobag® PaceSetter family of cost-effective table-top bagging systems.

The PaceSetter family of light weight, semi-automatic, table-top packaging equipment from Automated Packaging Systems provides a cost-effective alternative to fully automatic packaging.

If your packaging requirements are too large for a manual operation, but too small for a fully automated operation, then the PaceSetter is for you.

Capable of packaging over 20 bags per minute, the PaceSetter requires just one operator. It automatically indexes a bag into position, opens it up for manual loading and tear off, and seals the finished bag.

The PaceSetter is designed to use Autobag reel-fed, polyethylene bags which are available in a wide range of sizes and formats. They can also be customised with built-in headers, easy-open perforations and hanger holes and are available plain or printed in up to six colours.

### User Benefits

Compact and lightweight for table-top use.

Quick to set up, easy to operate and reliable.

Three standard models available.

All-electric design for quiet operation.

Separate controls for heating and cooling cycles so seal quality is consistently high.

# PaceSetter™

## Standard Features

- Adjustable controls regulate heat / cool sealing times
- Stainless loading surface
- Cycle counter (except HB-25 model)
- One-touch auto-sealer (except HB-25 model)
- 110/220 VAC (50/60Hz) electrics
- CE approval

## Typical Applications

- Automotive & replacement parts
- Electrical & electronic components
- Fasteners & connectors
- Appliance parts & supplies
- Plumbing & heating parts
- Hardware & hardline items
- Hobby & craft products
- Jewellery & novelty items
- Cosmetics & beauty aids
- Disposable health care products

## Specifications

| Model              | HB-65  | HB-55               | HB-25           |
|--------------------|--|---------------------|-----------------|
| <b>Dimensions:</b> |  |                     |                 |
| H x W x D (cm)     | 40x53x40                                     | 40x53x40            | 40x53x47        |
| Weight (kg)        | 27   | 24                  | 24              |
| Packages per min.  | 20+  | 15-20               | 10-18           |
| Sealing Method     | One-touch automatic                          | One-touch automatic | Built-in manual |
| Cycle Counter      | Standard                                     | Standard            | N/A             |
| Loading Tray       | Standard                                     | Optional            | Optional        |
| Bag Sizes          | 6.5cm (W) x 6.5cm (L) to 27cm (W) x 55cm (L) |                     |                 |

## Dedicated support

All our employees are dedicated to delivering a first-class packaging system and maintaining the very highest standards of customer care and technical support.

Customers can be assured of machinery and materials that meet or exceed every industry standard and which are subjected to on-going stringent quality control testing. Highly trained service and maintenance engineers make regular calls to give technical support where needed and to ensure continuous peak performance.

All orders for machinery and materials receive a rapid response and regular contact is maintained so that customers remain fully updated on all the latest developments.

In addition we provide comprehensive training programmes in modern, well-equipped premises with full machine demonstration facilities. Operator training is also given at customers' premises.
