

Productivity Option: Autobag[®] Seal Flatteners – Improve seal appearance when bagging bulky products

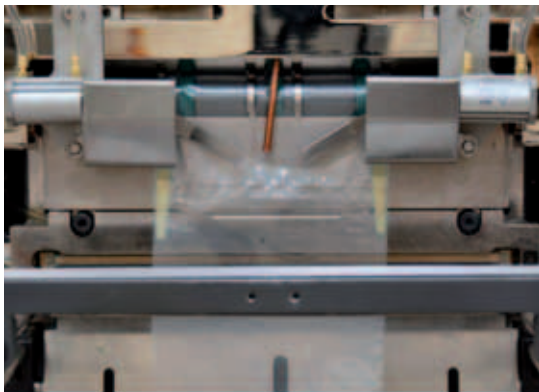

Productivity Options are often a cost-effective way to optimise overall packaging system performance. Automated Packaging Systems offers a variety of basic Productivity Options that are designed to increase packaging speeds, improve ergonomics, or efficiently tie-in to existing production lines.

The Seal Flattener is an option that improves seal appearance when packaging bulky products that tend to wrinkle the bag during loading. The Seal Flattener “fingers” smooth out the film just prior to sealing, and automatically fold away during the bag loading process.

Seal Flatteners are easily set-up using the AutoTouch™ Control Screen, and are adjustable to fit a variety of bag sizes.

User Benefits

- Improves seal appearance when packaging bulky products
- Easily adjustable to accommodate various bag sizes
- Automatically folds out of the way during bag loading
- Sets up easily using the AutoTouch Control Screen
