

Premium, Ultra-V Resin Enhanced Wax Thermal Ribbon — Quality printing and longer print head life guaranteed

Genuine AutoLabel Ultra-V Thermal Transfer Ribbon prints high-resolution bar codes, text and graphics — and is system-matched for optimum performance on Autobag® thermal transfer imprinters*.

Ultra-V is a specially formulated, resin enhanced wax ribbon designed for durability and resistance to scratching, smearing, flaking and ultraviolet rays. Superior density and contrast provide precision printing with excellent edge definition in high-speed

imprinting applications. Ultra-V is ideal for applying small characters and high-quality bar codes that produce optimum scan rates. Graphic images created using Ultra-V ribbon are crisp and durable, enhancing aesthetic quality and customer appeal. Ultra-V is also ideal in demand label applications requiring high performance printing.

Ultra-V ribbon features SPECTR™, an innovative static elimination system that completely removes static, and repels harmful contaminants that can damage print heads. The patent pending SPECTR™ formula is inside the ink, not used as a back coating, protecting equipment and operators from electrostatic discharge.

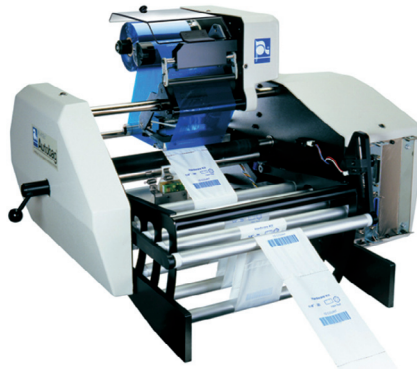

Using AutoLabel Ultra-V Thermal Transfer Ribbon, along with Autobag Print-n-Pack Systems and genuine Autobag brand bags-on-a-roll, provides a complete and cost-effective packaging solution.

User Benefits

- Superior density, high contrast and excellent edge definition for high-resolution printing of graphics, text and bar codes
- Extremely durable — resists scratching, smearing, flaking, and damage from harmful ultra-violet rays
- SPECTR™ static elimination protects equipment from electrostatic discharge
- System-matched with Autobag packaging machines and materials for optimum performance
- Manufactured under ISO 9001/9002 certified processes to ensure consistent quality
- Available in a wide variety of stock and custom colours
- One-year guaranteed shelf-life when properly stored
- Professional applications support for custom solutions
- Roll sizes include 2000' lengths in widths of 50.8mm, 63.5mm, 76.2, 88.9mm and 101.6mm

Typical Applications

- Product identification and bar code labelling for retail and industrial markets
- Inline graphics imprinting of logos, line art and two-colour artwork using the Autobag PI412cw Prism printer
- High-quality demand label printing
- Shipping and address labels
- All general purpose labelling
