GeoTech® Recycled Film - 50

BENEFITS

The Recycled film is manufactured with a minimum 50% recycled content* in line with Sealed Air's 2025 Sustainability and Materials Pledge.

It is part of the GeoTech family of films, which provides environmentally-responsible packaging solutions that reduce landfill waste.

The Recycled film retains a high composition of the Standard Film, which ensures strength and durability while maintaining good clarity.

This material is available in clear and white. There are a range of other tinted colours available, minimum order quantities may apply.

Store in a dry area, temperature should be between 10-30°C. Not to be stored in direct sunlight.

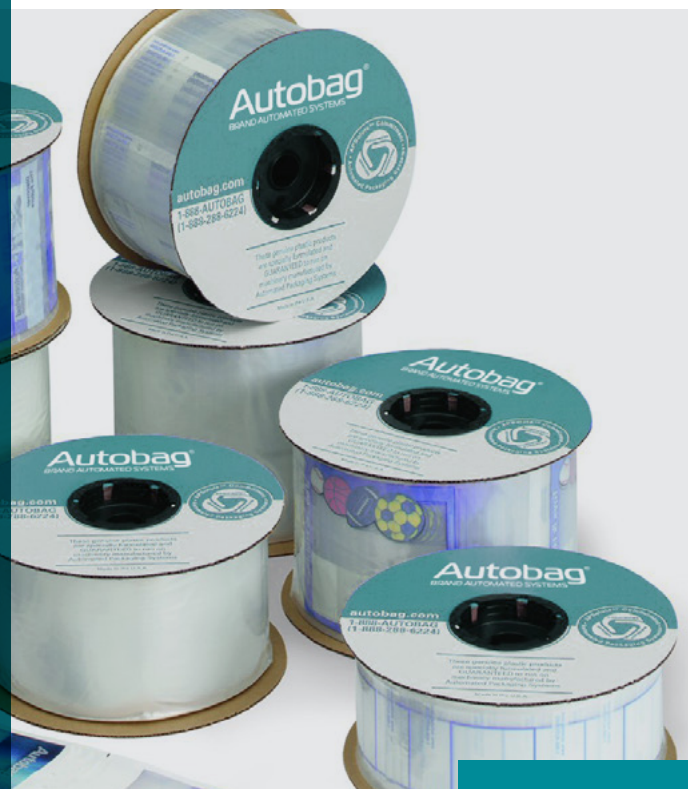

This product is capable of being fully recycled

OPTIONAL FEATURES
